## Technical Profile

### Photosensitivity

Low; slightly ambers with age and prolonged exposure to sunlight and oxygen.

### Grain

Closed grain with moderate definition; somewhat rough-textured.

### Janka Hardness

1820 lbf average.

### Specific Gravity

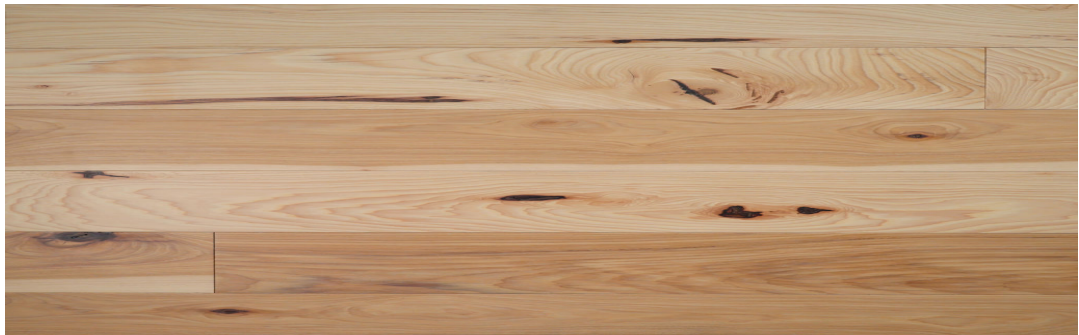

0.72 average at 12% MC.

### In-Use Stability

Below average.

### Finish Notes

Sands well, often benefiting from higher final grits to minimize visible scratching; accepts stains and finishes very nicely.

American Collection · Luxury Wide Plank Collection

# Hickory

## PREFINISHED BREEZE

Hickory brings dramatic natural variation, with tan-to-reddish heartwood set against white-to-cream sapwood marked by fine brown lines. In the Breeze prefinish, that contrast is softened into a lighter, calmer presentation without losing the species' distinctive energy.

Its ring-porous structure and closed, moderately defined grain create a strong, characterful surface, while the character grading keeps the floor organic and visually expressive.

### Distinctive Attributes

This character-grade floor welcomes broad heartwood and sapwood variation along with sound knots, open character, worm holes, checks, streaks, and bird pecks. Open knots and open character up to 1/2 in. are fillable, creating a naturally expressive look.

Flooring Specifications	
<b>Prefinish</b>	Breeze
<b>Sold</b>	In full carton
<b>Shipping Weight</b>	4.16 lbs per sq. ft.
<b>Edge</b>	4-sided micro-beveled edge
<b>Installation</b>	Nail/staple down, glue assist, glue down (engineered only)
