## Technical Profile

### Photosensitivity

High; darkens to a deep reddish-brown with age and sun exposure.

### Grain

Normally straight with a fine, uniform, satiny texture; curly or wavy figure may appear.

### Janka Hardness

950 lbf average.

### Specific Gravity

0.50 average at 12% MC.

### In-Use Stability

Average.

### Finish Notes

Prefinished natural cherry showcases the species' warm natural color with a solid-based ceramic urethane finish.

American Collection · Luxury Wide Plank Collection

## Cherry

### PREFINISHED NATURAL

Cherry offers the refined warmth of an American classic in a prefinished natural presentation. Heartwood ranges from light pinkish red to reddish brown, while lighter sapwood may appear in pale yellow to light brown tones. Dark streaks are common, and boards can vary noticeably in both grain and color. Its fine, satiny texture and naturally expressive figure give the floor a tailored look with real movement. Curly or wavy grain, gum pockets, and gentle tonal contrast lend visual depth, while the natural prefinished surface highlights the species' color as it deepens gracefully over time.

### Distinctive Attributes

This character-grade floor highlights distinct variation in heartwood and limited sapwood, along with sound knots and natural wood character. Open knots and open character up to 1/2 in. are fillable, and the grade may include worm holes, checks, streaks, and gum pockets for a naturally layered, organic appearance.

### Flooring Specifications
