Technical Profile

Photosensitivity

Low; slightly ambers with age and prolonged sun exposure.

Grain

Ring-porous with closed grain, moderate definition, and a somewhat rough texture.

Janka Hardness

1820 lbf average.

Specific Gravity

0.72 average at 12% MC.

In-Use Stability

Below average.

Finish Notes

Cuts, routs, planes, and shapes well. Sands satisfactorily and may benefit from a higher final grit to minimize visible scratches. Accepts stains and finishes very nicely.

American Collection · Luxury Wide Plank Collection

Hickory

Prefinished Natural

Hickory Character offers bold natural movement and unmistakable American hardwood personality. Heartwood ranges from tan to reddish brown, while sapwood appears white to cream with fine brown lines for a lively, high-contrast visual mix. Its ring-porous structure and closed grain create a surface with moderate definition and authentic texture, making it a strong fit for interiors that want real hardwood character with visible variation.

Distinctive Attributes

This character-grade floor welcomes distinct heartwood and sapwood variation along with sound knots. It may include open knots and open character up to 1/2 in. in diameter that are fillable, plus worm holes, checks, streaks, and bird pecks. Heartwood and sapwood variation is intentionally unrestricted.
